TO RUN EXPRESS SERVICE.

Planned to Relieve Congestion on Line to Mount Rainier.

A passenger express car service is to be inaugurated Monday on the City and Suburban railway system which runs to extend only from 15th and G streets to the District line at Mount Rainier, according to announcement made at the District electric railway commission offices today, and will be run only in the rush hours of the morning and afternoon. About ten trips each way are figured on by the offi-cials of the Washington Railway and Electric Company, which controls the suburban system.

The express cars will make no stops except at fire and emergency points and it is believed that the proposed service will relieve congestion on the line at the times when travel is the heaviest. The service was suggested to the District commission by the Washington Railway and Electric Company officials and no time was lost in giving the permission for the proposed new schedule.
